New name for MAGI

MAGI's mission is to standardize best practices for clinical research operations, business and regulatory compliance. ("MAGI" is pronounced with "G" as in Georgia and "I" as in Ireland.) "MAGI" originally stood for Model Agreement Group Initiative, but our scope is now much broader than clinical trial agreements, so the acronym has no meaning. We are therefore looking for a new name that fits the MAGI acronym. Here are the contestants so far:

- Model Agreements & Guidelines International
- Management of Agreements, Guidelines and Instructions
- Multiple Aspects for Global Implementation
- Models for the Acceleration of Global Investigation
- Managing Activities for Global Interactions

More suggestions are welcome.
